As a protection to our customers who are entitled to wholesale or florists' prices we ask that they do not lend this catalog to persons not entitled thereto. It will save us considerable embarrassment. Tell them to send for our "Seed Book"—Free upon request.

**NOTICE TO CUSTOMERS IN CANADA AND OTHER COUNTRIES  
OUTSIDE OF THE UNITED STATES**

In remitting for purchases at the time of ordering, or when paying accounts by reason of the Exchange we ask that you please send P. O. Money order in U. S. Funds or a check or draft on a New York or Philadelphia Bank in par U. S. Funds.

**WE ESPECIALLY INVITE  
CHARGE ACCOUNTS**

A charge account is more convenient than to remit for each order at the time it is sent us; you pay no more for your goods by reason of this accommodation. As to our responsibility, we refer you to **Dun and Bradstreet's Mercantile Agency** or any bank or trust company.

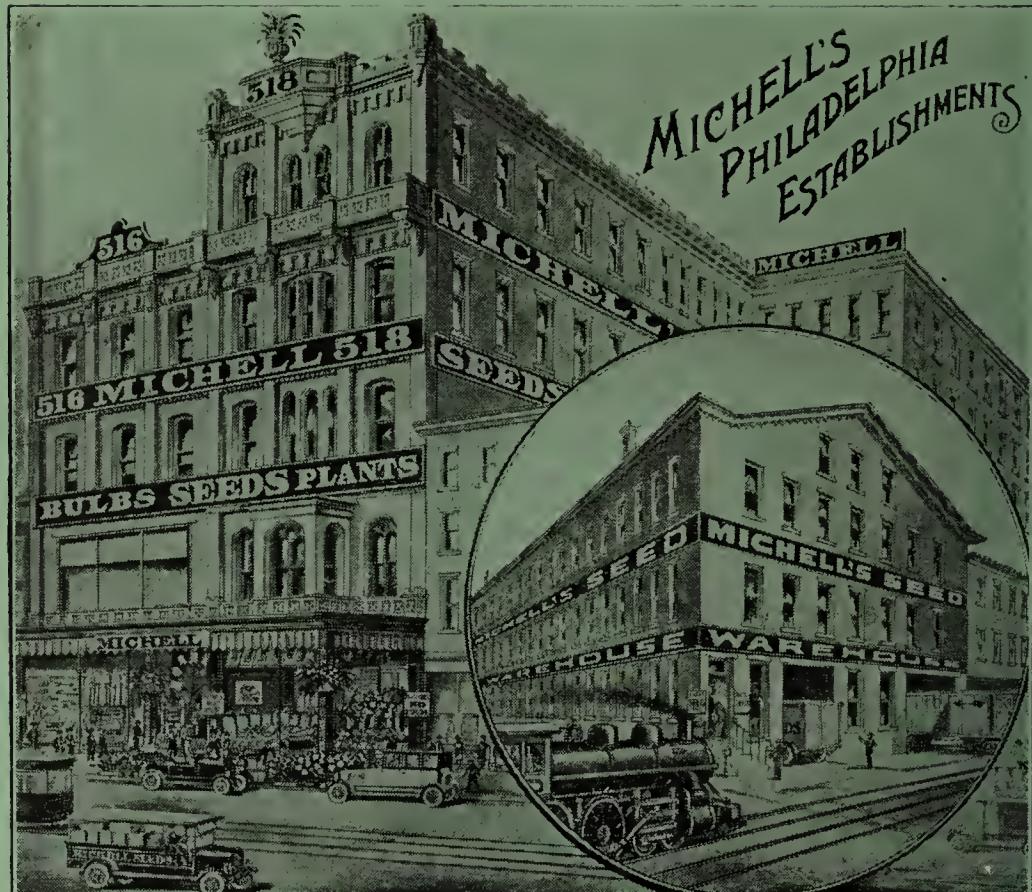

When sending your first charge order, refer preferably to someone in either your own or our line of business with whom you have a charge account. This frequently saves delay.

**DISCOUNTS**

On bills for Flower Seeds, Vegetable Seeds and Bulbs, a discount of 2% for payment 10 days from date of bill may be deducted; 5% cash discount is allowed on all orders of Flower Seeds and 3% cash discount on all orders of Vegetable Seeds and Bulbs when remittance accompanies the order, unless on items specially quoted or priced. Cash discount above does not apply to dealers orders, unless so stated in quotations or otherwise. All other goods are strictly net, as are also bills for goods supplied under special quotations unless otherwise agreed upon.

**SPECIAL NOTICE.**—We pay postage on all orders for Vegetable and Flower Seeds provided the order calls for packets, ounces, quarter pounds or pounds (beans, corn, peas and grass seeds, bulbs, plants and sundries are not included). If these are wanted by mail, remit for postage the amount named in connection with the item to the first and second zones; for other zones add additional postage. All postage is charged on dealers orders regardless of items ordered.

**PARCEL POST RATES.**—On Seeds, Bulbs, Plants or Roots not exceeding eight (8) ounces in weight, the postage charge is 1c. for each two (2) ounces or fraction thereof; on sundries or other merchandise not exceeding (8) ounces in weight, the postage charge is 1½c. for each two (2) ounces or fraction thereof. Seeds, Bulbs, Plants, Roots, Sundries, etc., weighing over eight (8) ounces, are sent at zone rates.

If Special Delivery is wanted an additional 15c. is required on packages ~~weighing~~ up to two (2) pounds—25c. on packages weighing more than two (2) pounds and up to ten (10) pounds—35c. on packages weighing more than ten (10) pounds, which also includes special handling and transportation as first-class mail.

If remittance accompanies order, a sufficient amount should be included to cover the extra charges—if ordered to be sent by either of the methods as stated above.

We do not make shipments of Plants or Cold Storage Bulbs C. O. D. and shipments of goods C. O. D. outside of our automobile delivery limits can only be made that way provided a partial remittance is sent with the order to guarantee that the goods will be accepted on arrival.

**IMPORTANT NOTICE.**—All shipments of plants, perishable stock and cold storage bulbs are made at buyers' risk only.

If such shipments arrive in bad condition, accept them and receipt for them accordingly, and make claim for your loss on the transportation company. We, of course, will hold ourselves ready to assist you in any possible way. It has been found that claims can be collected more readily by the person receiving the goods than by the shipper.

Our custom to guarantee the **actual arrival** of goods (except at points where there is no freight or express agent) will still be continued, and claims for loss or **non-arrival** of merchandise **not perishable** will, as in the past, be cared for by us, so you run no risk of having to make claims for lost goods.

**CONDITIONS OF SALES**

All contracts, sales and acknowledgments of orders are contingent upon crop failures, our ability to import and make deliveries in conformity with the "Plant Quarantine Act," partial deliveries by growers or manufacturers, strikes, or other unavoidable causes beyond our control, clerical errors included; also unsatisfactory credit standing. All quotations are subject to market changes and goods being unsold on receipt of order. Henry F. Michell Co. give no warranty, expressed or implied, as to the description, purity or productiveness of any seeds, plants or bulbs they send out, and they cannot be in any way responsible for the crop. A very valuable novelty that has created a sensation as a most desirable cut flower; it is a distinct type, producing no singles whatsoever, the flowers coming 100% double and semi-double. In color, a clear orange flushed with gold; it is very loose petaled and lacks the odor of the regular African Marigold. Trade pkt., 40c.; \$1.50 per oz.

*Nasturtium, Golden Gleam*

This new type is of semi-trailing habit and is a new development in Nasturtiums. The plant forms a vigorous large bush, which throws out short runners averaging 18 inches. The sweet scented, large double flowers are of a golden yellow color and average 2 to 3 inches across. They are borne on erect stiff stems 6 inches in length and stand well above the foliage; splendid for cutting. For the florist who grows pot plants this variety is a good proposition and well grown plants in 3 inch pots will find a ready sale. The seed we offer is strictly originator's stock. This miniature variety is indispensable for borders, window boxes, pots, rock gardens and for bedding; a very pleasing effect can be obtained by planting this variety with dwarf blue Ageratum. # MICHELL'S SUPERB ASTERS

9

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. Michell's "Distinctive" Quality is nowhere more prominent than with our Asters, and we can recommend them with the utmost confidence to produce the very best results. Our seed is grown from plants which are free from disease.

**SPECIAL NOTE.**—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible; barnyard manure should never be employed as a fertilizer; we recommend the use of finely ground bone meal. Asters should not be grown in the same location two years in succession.

# MICHELL'S WINTER FLOWERING SPENCER OR ORCHID SWEET PEAS

29

## NOVELTY SWEET PEAS EARLY OR WINTER FLOWERING

**Sensation (Duplex).** We are proud to introduce this new Winter Flowering Sweet Pea as an exceptionally fine novelty for the Fall season. The large duplex petalled flowers give the blooms the appearance of being double. Color, a clear-toned, luminous Geranium pink which is a new shade in the early varieties and excellent under artificial light. The flowers (usually fours) are large and well placed on long, strong, wiry stems; a strong vigorous grower and free bloomer. The general characteristics of this variety make it the outstanding Sweet Pea of the year and we believe that, as its name implies, it will create a sensation wherever grown. Per oz., \$2.00; \$7.00 per  $\frac{1}{4}$  lb.; lb., \$20.00.

**Eleanor Blue.** This is another good novelty in the new and popular Eleanor Blue shade; a clear light blue with a delightful silver sheen; the flowers are exceptionally large, beautifully frilled and of perfect Spencer form, with fours predominating, on enormous long, strong stems. This variety is pleasingly fragrant and a very free bloomer. Per oz., \$1.00; \$3.50 per  $\frac{1}{4}$  lb.; lb., \$12.50.

**Susanna.** Large flowers of a rich carmine color, on long stems; an improvement over existing varieties in this color. Per oz., \$1.00; \$3.50 per  $\frac{1}{4}$  lb.; lb., \$12.50.

Eleanor Blue and Sensation make an excellent color combination.

# MICHELL'S RECLEANED GRASS SEED

Our connections with the best grass seed producers in America and Europe place us in a position of advantage for our supplies, chiefly because of the great volume of grass seeds we contract for. Some people have an idea that price is the only factor to consider in grass seed buying; while this has its place, it should be an afterthought. "Quality is paramount." We are always pleased to submit samples with prices for comparison and let our customers be the judge.

## QUANTITY OF LAWN SEED REQUIRED FOR A GIVEN SPACE

To secure best results we advise sowing on new ground with no sod on, 6 to 8 bushels of 20 lbs. per bushel to an acre; on established lawns or grass plots usually one half the quantity is sufficient. On a smaller scale, 1 quart for 100 square feet; 1 peck for 1000 square feet;  $\frac{1}{2}$  bushel for 2000 square feet; 1 bushel for 4000 square feet; for putting greens we advise 100 lbs. of seed to a green 100 x 100 feet; for fairways 8 to 10 bushels (20 lbs. per bu.) to the acre; for pastures and hayfields 80 to 100 lbs. per acre.

If Mixed Grass Seeds are wanted by Parcel Post, add for postage as follows: 10c. for 2 qts.; 10c. for 4 qts.; 15c. per peck; 20c. per  $\frac{1}{2}$  bu.; 30c. per bu.; larger quantities by express or freight.

# MICHELL'S SPECIAL BRAND LILY BULBS

## Suggestions in Connection with the Growing of Hardy Lilies Under Glass

Hardy lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained. In fact, if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many early blooms. We have particular reference to *Lilium Magnificum*, *Melpomene*, *Rubrum* and *Album*.

If Lilies are wanted by Parcel Post, please add 25c. per doz. for postage.

## HARDY JAPANESE LILIES

A splendid proposition; they force readily in a moderate temperature, as described above. Prices are for shipment up to May 1st, and include all cold storage charges. After this date an additional 20 cents per case, per month, will be made for cold storage and insurance charges.

## LILIUM PHILIPPINENSE FORMOSANUM Flowers Outdoors in July

Here you have an ideal Lily for growing under glass or in the garden or nursery. It blooms profusely, is very fragrant and flowers resemble an Easter Lily. Color pure white, outside of bloom when first opening is slightly colored with reddish brown; this coloration fades as the flower matures. Strong bulbs, 4 to 6 inch, \$1.50 per doz.; per 100, \$10.00.

## LILY OF THE VALLEY

### Bundles or Clumps (for Outdoor Use Only)

Excellent for landscape work. Bundles contain 12 good size pips with good root growth, all of which will flower. They are imported from abroad, the best of the crop being selected for us, carefully packed and can be stored in a cold cellar. These pips should not be compared with native grown stock which usually throw an average of 2 to 3 flowers to the clump; pips are washed clean and packed in peat moss, thus making transportation light. We can make shipment of these as late as May 1st. Why not try a few for your trade? The Japanese Beetle quarantine does not affect the shipment of this stock. 40c. per bundle; doz. bundles, \$4.25; \$38.00 per 100 bundles.

## LILY OF THE VALLEY

FOR ROCK GARDENS, LANDSCAPING, CUT FLOWERS AND HOME GARDENS

## IMPORTANT FOR FLORISTS

We are presenting herewith our Wholesale Perennial List; checking through, you will note that we are listing one of the best assortments for all types of plantings. All plants offered are field grown, except where noted, developed to a point where, after planting in their permanent locations, they will give immediate results.

As time goes on, there are more florists realizing the fact that the use of perennials is an important factor in their business throughout the dull Summer months.

Within the past few years many florists have made plantings of perennials in some vacant land adjoining or close to their greenhouses. They are finding it more important every year to be able to cut outdoor flowers while they are changing soil and preparing their houses for their usual run of greenhouse stock.

We are advised by many leading florists, who have made a practice of this, that the benefits derived from a perennial planting are beyond explanation by mere words. While the greenhouse is idle, perennials fill the gap in the way of supplying fresh flowers which are suitable for general florists' use and thus prevent them from ordering flowers from distant wholesale markets. They are able at all times to cut fresh flowers for their special work throughout the months of July, August and September, when there are practically no greenhouse flowers to be had. An investment in perennials is indispensable and pays returns each year that are many times larger than the original amount invested.

*Use Perennials for Summer cutting, for Forcing in the Winter and for Landscaping and Rockeries. Varieties marked (\*) are especially suited for cutting, while varieties marked (R) are indispensable for Rockeries.*

If shipments arrive in bad condition, accept them and receipt for them accordingly and make claim for your loss on the transportation company. We, of course, hold ourselves ready to assist you in any possible way. It has been found that claims can be collected more readily by the person receiving the goods than by the shipper.

However, we cannot guarantee the success of the grower, who purchases the stock, except if the stock turns out not being true to name, and in such case, our liability is limited to the invoice value at the time of shipment.

We recommend all shipments to go by express, except small shipments, which can readily go by mail.

If shipments arrive in bad condition, accept them and receipt for them accordingly and enter claim to the transportation company. We, of course, will assist you in every possible way.

## KALANCHOE GLOBULIFERA COCCINEA

A real Horticultural Sensation and the most valuable pot plant ever introduced.

Plants are about 12-14" tall and if grown in a 6" pot will bear about 50 flower stems, resembling small Bouvardias, the color being brilliant cerise scarlet. Requires cool treatment, 50 to 55°. The plants will commence to flower in February and the flowers will remain in perfect shape for 3 months. Excellent as an Easter pot plant. The plants shipped out by us will have several seedlings planted in one pot, thereby assuring specimen plants. Kalanchoe was awarded Gold Medal at New York Flower Show and Honorable Mention at Philadelphia Show.

## Testimonial on Crassula Rubicunda!

Chatham, N. J., June 7, 1933.

We are sending you herewith Photographs of Crassula Rubicunda "Brillianty" as grown by us this Spring. This plant has been the subject of much interest from the time we received it last Fall.

The apparent slowness with which the buds develop has caused us to become discouraged at times, but when at length, we have the finished product, our hopes and expectations are exceeded.

We have before us magnificent flowering pot plants. Necessarily with new plants we must feel our way in order to arrive at a knowledge of their habits and possibilities, but from our many experiments, we are convinced that in Crassula "Brillianty" we have a pot plant which will prove to be just what we have been looking for, SOMETHING NEW FOR MOTHER'S DAY.
